Jack.Du

extremely javascript lover,always follow the latest technology

male   26 He-Nan,China   over 6+ years FE development

(+86)13373849087   dbx142857@gmail.com

work prefering

1 Be interested in various automation technology strategy,like one-key-deploy,auto testing etc.

2 Be interested in some hack skills,in order to make the relaize of some feature easier

3 Like to handle various difficult work,it will make me work more happy

4 sometimes I will made some subsidiary tools,to improve the work efficiency of mine or my workmates

work experience

UOS   2020.11 -- 2022.02
Advanced FE developer

1 UOS is a operating system based on Linux,almost is the No.1 in China in Linux OS field

2 Field management development within my work,to manage staffs,hardware,various USB device etch.

2 Using React and Vue to build the browser-based products

Smart-Parking   2020.01 -- 2020.11
Advanced FE developer

1 Smart-Paring is a crm platform to mamage parking lot,cars and sentry box

2 we used micro-Fe technology

2 my duty was primary develop and some software maintenance

Testin   2016.08 -- 2020.01
FE leader

1 deeply used vue2+vuex+webpack2+socket to build a huge to-B project:cloud android and web test-case recorder

2 Be responsible for FE framework coding,technology choose,recruit and guide some None-Senior workmates

3 draw up some alternately protocol with back-end development

4 build some sharing FE components

Kong-Kong Fox   2015.09 -- 2016.08
FE developer

1 deeply used angular 1.x to build some components for the cms project

2 builded one code package tool like webpack based on gulp,cause the webpack has note been popular yet

3 build FE framework like vue,used for micro Shopping Mall project

TIBCO   2013.03 -- 2015.09
Software engineer (Full stack)

1 used **php** (joomla)   + mysql + js/jq to build apix exchange project v1.0
2 used angular1.x + **nodejs**(express) + mongodb to build apix exchange v2.0

personal Projects

Hacker.js

1 Use my Hacker.js,you can do develop in react/angular/vue and any other project,without
to see the exised code
1 you can intercept the http request and response in the hacker component's lifecycle
elegantly

Omd.js

Omd means obsverable module Definition,to obsverable the script load
process,error,timeout etc. in app runtime

Veact.js

Veact means vue-react-in-one,you can define one vue component and one react
component in one file or two files,and one component can visit another

Hobbys

out-door activities,skiing,swimming

Expect Work

FE developmer   full-time   China   20k-35k

Thanks
